

Marketing & Communications Intern

Quantified Sensor Technology | Leiden

Are you creative, curious and eager to learn? Would you like to gain practical experience in marketing and communications? Join QST and help us increase our visibility through engaging content, campaigns and events.

About Quantified

Quantified Sensor Technology (QST) is a technology scale up based in The Netherlands specializing in the development of smart sensor solutions for agriculture. With decades of combined experience in science and industry, QST creates technological solutions to transform the horticulture industry. By measuring and controlling the uniformity of climate, irrigation and lighting using low-cost and low-power wireless IoT systems, Quantified helps growers to maximize yield and minimize the use of energy, crop protection chemicals, water and nutrients. Our stable technology is used by top-tier crop producers with facilities in The Netherlands and abroad.

What will you do?

You will work closely with our team to create content, support marketing campaigns and help organise events. You will help communicate how our technology benefits growers, with plenty of room to contribute your own ideas and explore your interests.

Your responsibilities may include:

- Helping organise and promote industry events, trade shows and webinars.
- Creating and scheduling content for LinkedIn and YouTube.
- Updating our website with news, blogs and upcoming events.
- Tracking content and campaign results to learn what works.

What do we offer?

- Practical marketing experience in a growing technology company.
- The opportunity to learn how to communicate technical products to an international audience.
- Space to develop your ideas and build a portfolio of content and campaigns.
- An engaged team that involves you in the business.

Who are we looking for?

- You are a third-year student at a university or university of applied sciences, preferably studying marketing, communications or a related field.
- You have an interest in marketing and communications and are curious about new topics.
- You are creative, proactive and organised.
- You enjoy working independently and collaborating with others.
- You communicate confidently in written and spoken English.
- You can regularly travel to our workplace at PLNT in Leiden.
- Experience with Canva or video editing is welcome, but not essential.
- We are looking for a highly motivated student . Come join us and let's shape the future of agriculture together!

Practical details

Start date: September/October 2026

Duration: 4 to 6 months
